Examiner's Reasons for Allowance

7. The following is an examiner's statement of reasons for allowance:

The prior art fails to render obvious the claimed radar and method including, inter alia, a signal-strength profile determining unit which determines a signal-strength profile from changes in strength in the azimuthal direction of a received signal from a target at a position that is spaced from the scanning unit as a function of the beam azimuth; and an estimating unit which estimates the target azimuth causing the signal-strength profile from the signal-strength profile, which is a portion of a convex located adjacent to the outermost angle in the scanning angular range as interconnected and functionally claimed. The present invention provides a radar that can detect target azimuths located outside and adjacent to a scanning angular range of a beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
